

MEKING BUILDTEC (INDIA) PVT LTD

INNOVATIVE STEEL CONSTRUCTION SOLUTIONS

Shaping the Future of Contemporary Infrastructure

THE COMPANY - MEKING STEEL

Company Profile

Meking Steel stands among India's fastest-growing manufacturers of steel structures and space frame solutions. Driven by a bold vision and a commitment to consistent growth, the company operates from its headquarters in Chennai and is supported by a robust network of manufacturing facilities across India and internationally.

Our Vision

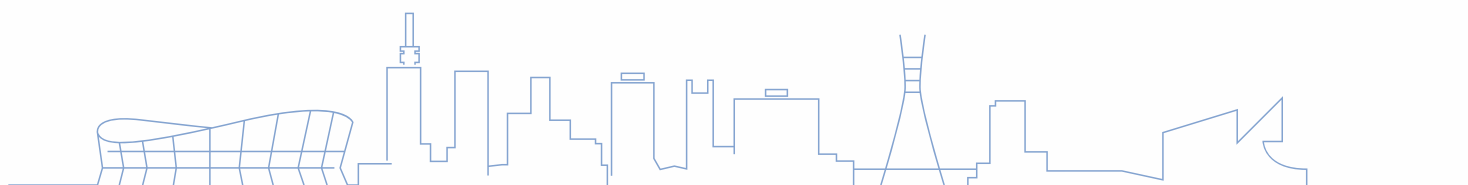

CREATING
GLOBAL BENCHMARK

We aim to set the standard as the most reliable, innovative, and premier supplier and service provider in the steel construction industry.

Our Mission

A TRUST BUILT
WITH PERFORMANCE

Our mission is to deliver exceptional steel construction products and services worldwide, driven by innovative technologies, a culture of excellence, and an unwavering commitment to ethics and continuous improvement - earning the lasting trust of our clients.

Manufacturing Facility

With ISO 9001-certified facilities across India, Meking Steel delivers world-class building system components. Each product is fabricated to meet the highest standards, adhering to MBMA guidelines for PEB members and AWS D1.1 standards for welding.

Project Excellence

Meking Steel Buildings (MSB) are engineered to the highest standards, with meticulous design calculations that ensure precision, transparency, and full compliance with national and international building codes. Meking Steel has successfully executed numerous large-span complex projects.

Why Meking?

- Proven Engineering Expertise
- World-Class Manufacturing Excellence
- Global Strength with Local Focus
- Smart Project Monitoring with IT-Enabled Live Tracking Tools
- Online Design, Engineering & Construction Services
- Strong Commitment to Safety Standards

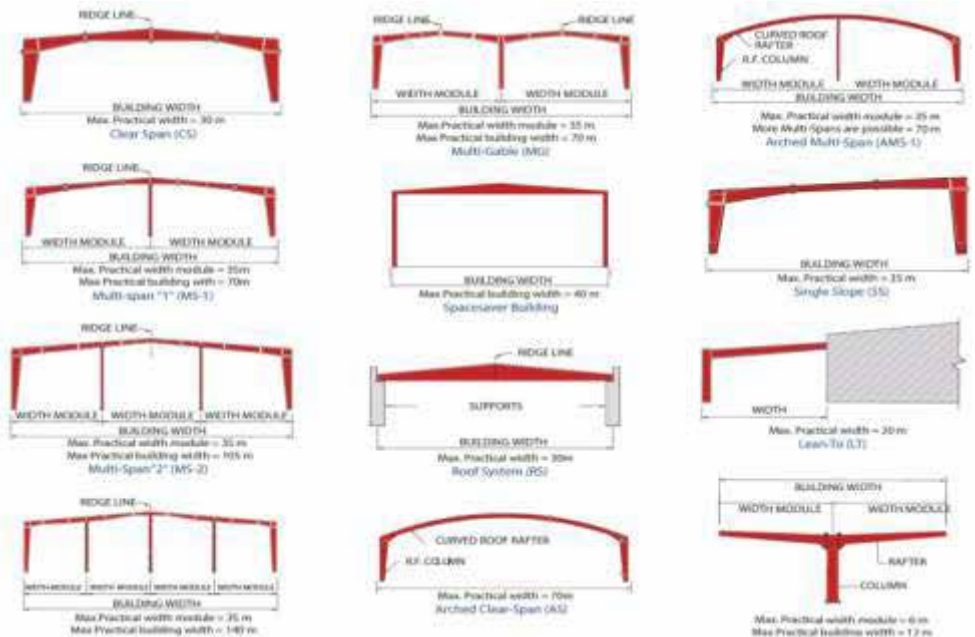

Pre – Engineered Steel Buildings

"Pre-Engineered Steel Buildings (PEB) are precision-crafted structures designed to meet the unique needs of each user, combining flexibility and efficiency in a single, bespoke solution."

The frames of Pre-Engineered Steel Buildings (PEB) are fabricated from standard steel plates, optimizing material usage. These frames feature tapered designs with variable flange and web thickness, ensuring efficient structural performance.

Building Frame Types

Accessories

Standing Seam Roof System (360 Degree)

- Double Lock Standing Seam (360) : Eliminates leakage risks, ensuring excellent weather protection
- Robust and Value-Engineered : Meking - Standing Seam roof system offers unparalleled durability and cost- effectiveness
- Leak-Proof Performance : Provides consistent weather tightness, minimizing maintenance

Benefits

Extended Roof Life: Enjoy a reliable, leak-free roof for an extended period.

Low Maintenance: Virtually maintenance-free performance, reducing upkeep costs and hassles.

Unmatched Weather Protection: Withstands all weather conditions, ensuring your building remains secure and protected.

Turnkey Solutions

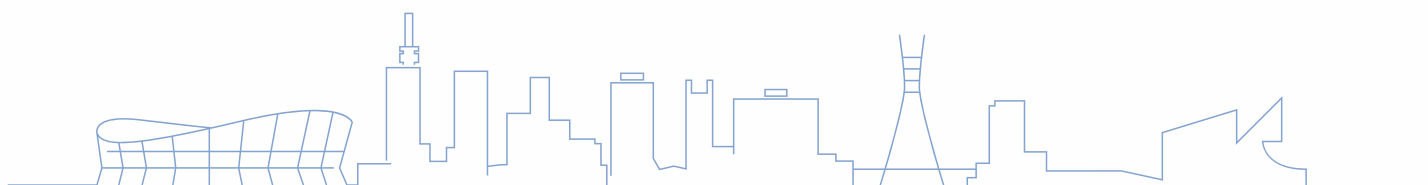

Meking Steel offers end-to-end turnkey solutions, including civil, structural, and MEP works, integrated with pre-engineered steel buildings for diverse applications.

Our comprehensive scope covers engineering, fabrication, supply, erection, and project management consultancy (PMC). We ensure strict quality control at every stage of execution through rigorous QC policies and well-documented processes-delivering efficient and reliable turnkey project delivery.

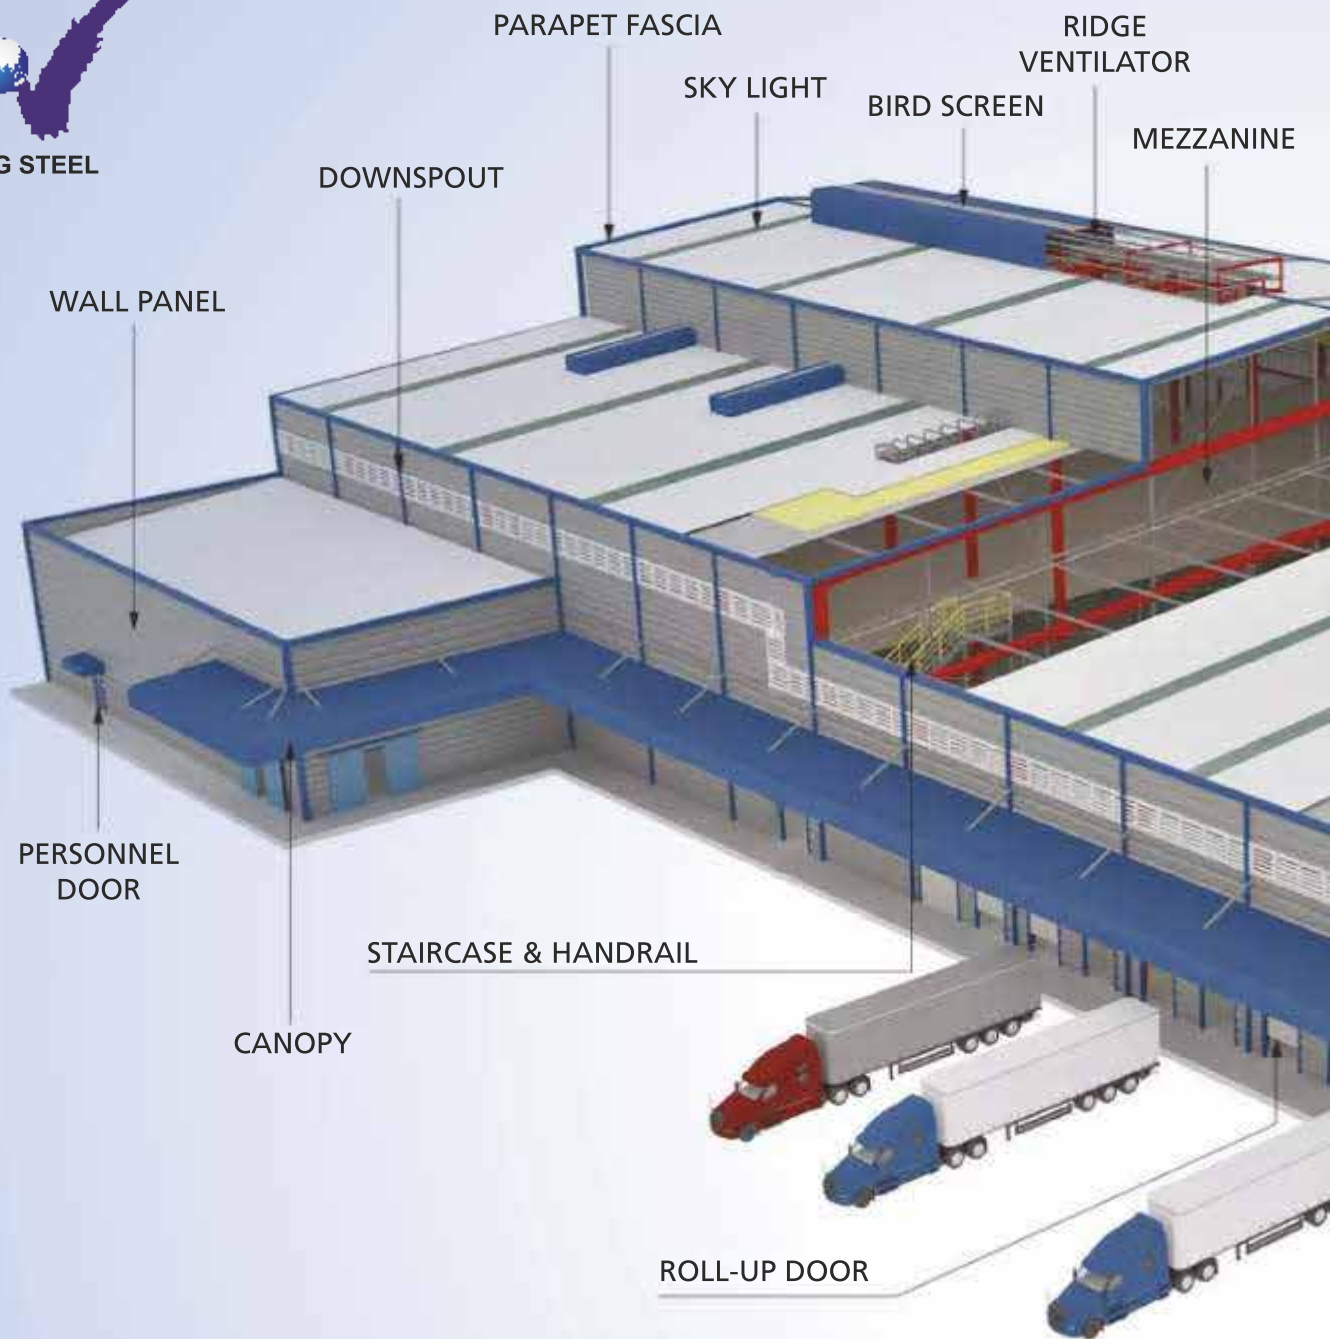

Meking – TATA Partnership

Meking Steel is a certified LYSAGHT® Solution Center, empowering us to deliver advanced roof and wall cladding solutions with unmatched quality, durability, and technical excellence.

SPACE FRAME STRUCTURES

Space frame structures comprise steel pipes intricately joined at various angles, forming a prefabricated 3D framework. Utilizing proprietary software, we design these systems in strict accordance with international codes, including ASIC, ANSI, ASCE, and IS standards.

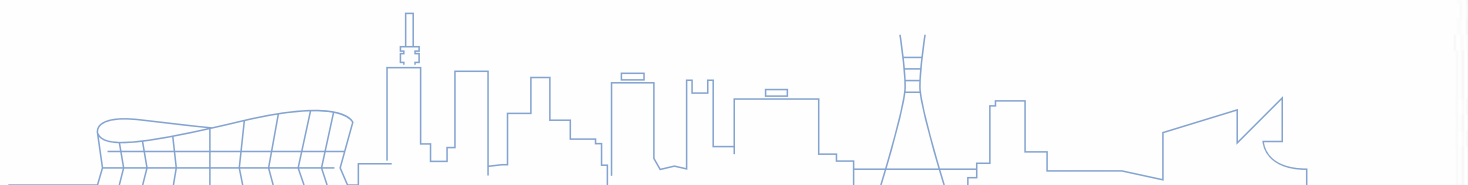

Key Advantages

- 1. Lightweight & Structurally Stable** : Optimal balance of strength and weight.
- 2. Earthquake-Resistant** : Robust design ensures durability and safety.
- 3. Cost-Effective & Fast Installation** : Reduced construction time and expenses.
- 4. Efficient Service Line Design** : Elevated features facilitate easy integration.
- 5. Long Clear Spans** : Up to 120m.

Key Applications

- Logistics & Stockyards
- Event spaces (Exhibition Halls, Theatres)
- Sports facilities (Gymnasiums, Clubs)
- Transportation hubs (Airport Terminals)

SAFETY IS OUR PRIORITY

**HSE Policy : Health, Safety and
Environment Convictions - All loss
can be prevented.**

HSE Performance is a line management responsibility-
Everyone must actively participate.

HSE is equally as important as any other business concern.
Compliance with policies, standards, procedures, rules
and regulations are vital.

All risk exposures must be reduced to an acceptable level.
Focus on elimination of at-risk behavior is key.

Demonstrate commitment through visible and active
leadership example Plan for HSE success in every task.

Do things in a healthy, safe secure and environmentally
friendly way. Management of HSE is an investment, not a
cost. HSE is a way of life 24/7 at Meking Steel.
